FLEX HRM ADD-ON

Visma Autopay

Connect your payroll system directly to your bank

With Flex HRM, you stay on top of time, travel, schedules and payroll. With the Visma Autopay add-on, you simplify salary payments too. Bank files are sent to the bank automatically, with no manual file handling. It saves time, reduces the risk of errors and makes your payroll flow more secure.

More secure salary payments – with less admin

Secure salary payments all the way to the bank

The bank file goes straight from Flex HRM Payroll to the bank, with no manual file handling. That reduces the risk of errors and unauthorized access.

Fewer manual steps

No more downloading, moving and uploading bank files. An automated flow means less admin and frees up your time for other things.

Full control with smooth approval flows

Build custom approval flows in 1–5 steps. The right people in management approve quickly and securely with BankID/2FA, without needing access to the bank.

One connected ecosystem

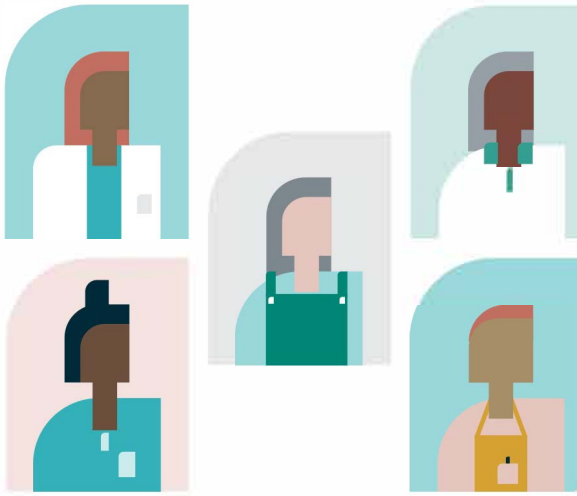

With Flex HRM and Visma Autopay, the whole chain fits together – from time and travel reporting to payroll calculation and payment. You get a better overview and more control over the process.

Who is it for?

Visma Autopay is a great fit for **companies and payroll bureaus that use Flex HRM Payroll** and want to handle salary payments in a safer, smoother way. No more downloading and uploading bank files by hand, so there's less risk of errors, and sensitive payment information stays protected all the way from payroll system to bank.

From 9 to 2 steps

Manual handling

1. Create the payment file in Flex HRM.
2. Export the bank file to your computer.
3. Log in to online banking.
4. Upload the bank file manually.
5. Sign the payment in the bank.
6. Log in to check the status.
7. Download the receipt or status file.
8. Log in to business software.
9. Upload the status file manually.

With Autopay

1. **Create and send:** The payment file is sent straight to Autopay.
2. **Approve:** An authorized approver gives the go-ahead.

A smooth approval flow for payroll

Set up a secure, simple approval process that fits your organization's approval rules:

- **Custom flow:** Up to five approval steps.
- **Role-based permissions (Payroll Approver):** Approvers don't need online banking access. They simply approve payroll in a clean, focused interface.
- **Secure signing with BankID/2FA:** Notifications are sent instantly when a payroll run is waiting for approval.

Direct integration with major Nordic banks
